

WILLUS INFRASTRUCTURE

PRE ENGINEERED BUILDING AND SPECIAL STEEL STRUCTURE SOLUTIONS

FROM THE DESK

Managing Director

Mr. Ritesh Bhandari

Ritesh Bhandari
Managing Director

Brief description of Ritesh Bhandari

Ritesh Bhandari is considered one of the top PEB professionals. He has the unique combination of processing specialization in design ,fabrication, quality control and erection, his wide experience ranging from H.O.D design interarch to heading various big PEB companies .his ability to give best of solutions to most complex requirements are well appreciated in market because of unique erection, fabrication and design knowledge. He has the experience of 25 years in steel buildings and 20 years in PEB with execution experience of 4000 buildings ranging from 54m high rise buildings to 150 ton crane buildings to 75m clear span buildings .he knows what is the importance of specification in the life of buildings and performance of building. And have excelled in most complex building of PEB in india.

We thank you for giving us opportunity to showcase our skills .i am serving steel structures from last 25years . 20 years before I realized importance of pre-engineered buildings . Owners were struggling to find right combination of good structural designer, perfect steel supply and professional fabricators .PEB companies solved their problems by giving one stop solution.

I realized that the crust of good building is totally dependent upon quality of people .PEB is not about a product but more on services .each building is unique and every building has different requirements .to understand the actual needs of customer we need experienced marketing person. To give perfect solution we need experienced designers. To turn design intent to product we need good quality control team . To turn a good product into building we need perfect erection team.

Major PEB companies have always struggle to hire best professionals in all departments within cost efficiency.this resulted in major companies tagging as a specialist in different fields or becoming an expensive supplier .minor companies failed to give best products though giving cheaper price .

15 years ago I realized the importance of building a good team to give best of services .i started training people and learning other fields and testing people in challenging atmosphere .i have trained around 128 peb professionals who are serving as best PEB professionals and I have used my people to build various companies from scratch to sky in few years.

My decision to start my own companies along with my favorite teams as our intent to create a middle space for us in mid segment, where we don't build too large operations so that things become uncontrollable and neither too small, where economy of scale don't pressurize you to cut the corners . I believe meeting my team will be pleasure for you of experiencing exuberance of youth blended with high moral and technical skills .we also invite you to see our newly installed state of the art manufacturing facility in Pune and Noida .

ABOUT WILLUS

Willusinfra Private Ltd., founded in 2015 having two plants in pune and Noida , with team having over 25 years' experience in steel fabrication and a wide range skills and processes. The core team has worked for major PEB companies with the most challenging building Configurations

We have the flexibility to tailor our production to meet the needs of our clients. Our experienced and expertise also allows us to work closely with our clients from the design stage of projects until final dispatch to site.

.There is still a void of giving value of money services. willusinfra has the vision to fill the void and create a new segment in PEB industry where every KG is consumed with full engineering and experienced services. We focus on best suited product for customer requirement.

Willusinfra is set to make its own space in innovative products ,innovative services and high speed execution with validation services to check errors

NOIDA FACTORY

Builtup Capacity - 12000mt /Year
Cold Form Sheeting - 12000mt/Year

CNC Plazma and Oxycutting Machine.

C N Z Roll Forming Machine

Pull Thru Submerged Arc Welding Machine

Deck Sheeting Machine
Roof Roll Forming Machine

PUNE FACTORY

Builtup Capacity - 9000mt /Year
Cold Form Sheeting - 9000mt/Year

Roof Roll Forming Machine

Automatic Horizontal Beam Assembly

CNC Plasma And Oxy Cut Machine

Automatic Gantry Submerged Arch Welding

C N Z Roll Forming Machine

WHAT IS PEB?

COLD FORMED SYSTEMS AND ACCESSORIES

Hi Rib Roofing Profile

Wall Cladding Profile

Standing Seam

C N Z Profile

Glasswool

Turbo Vent

Louvers

Ridge Vents

LIGHT GAUGE COLDFORMED LATTICE AND PORTAL SYSTEM

Most economical structural system for small Spans and medium spans upto 24m span. Approximate 12% cheaper than PEB systems and 25 years corrosion proof guarantee.

This is fast production without welding system.

Poultry systems

Light gauge systems are very popular in poultry Buildings because of corrosion proofing and economy Made from Galvalum / Jam Steels these buildings Provide lifetime paint free maintenance We provide all attachment to feeding ,drinking Cooling pad and fan system, this system can also Be made for double story broiler houses .
